# IDXpert Labelling Solutions

## What is the IDXpert?

The **Brady IDXpert** is what looks like a regular hand-held printer, but is actually able to print self-laminating labels as well as heat-shrinkable sleeves, component labels and other continuous labels. The IDXpert works with handy interchangeable material cartridges and automatically recognises whichever cartridge is installed.

The IDXpert is available in two styles. The ABC layout is the ideal choice to labelling on-the-go and out in the field, while the QWERTY layout offers you the advantages of a QWERTY keyboard.

IDXpert QWERTY keyboard

### Technical Information

#### Dimensions:

<b>ABC Model:</b>	95.25mm x 292.1mm x 127mm
